Mana Shield is a status effect that reduces incoming damage by displacing 85% of it through MP. If MP reaches 0, then the Magic Guard effect will wear off.

My all-time favorite puzzle game made even better with more puzzles, missions, modes, some skins that, I think, weren't in the original on PSP, and an online leaderboard for those that are feeling competitive. Definitely worth the full price if you're either a fan of the series or puzzle genre.

(Roundabout best song/skin). It's bad. I mean, sure it's EA, but for being out 5 months and still having these issues? I mean, it's baaaaaad.

I'll check back when these issues are more ironed out. Right now it feels like a great game concept with poor execution. I walked in one building that had double doors in some areas, and others were just one regular door. I don't mean two doors side-by-side, I mean two doors literally occupying the same space. Some were even off their expected spawn, blocking the doorway entirely even when opened.

I walked over a can and took damage. I walked up stairs and lost control of my character entirely, no inventory or weapon wheel or anything. Play as a zombie mode was worse, with invisible torsos shooting guns or swinging knives. Even with max view distance, the game won't render them unless you get say 20 yards from them. I died with 200 HP and that's a game over even though I still had enough HP to stay alive. I didn't do much combat in sandbox mode for wanting to play it smart, but what little I did was rough. There's no real feel that you're fighting. HP and whatnot are so far in the corner and so small that you can't see the bars unless you avert your eyes from combat.

How the reviews are mostly positive with this bug-fest, I haven't the foggiest. Again, great concept. Like, I'd love to see this done correctly. But as-is, in its current state, I can't see anyone playing this game to fruition. Reading the reviews, some have, and bless them for their patience.. Its a must to get this dlc you get Forest warrior who very tantalizing. I kind wish they had expansion pack that had you kept your elven friend alive option. Takate is lot more helpful in fighting though.. only plays in windowed mode.. Quaint little game~

Total cash grab. Could have been a great game, fishing with friends online would have been awesome. You can't go two seconds without some sort of popup telling you to buy premium. Not only that but the fishing, although it has some accuracy, is for the most part arcade style and brainless. Put on the right bait and cast, and you catch the fish. Simple as that.. this game is sh#% i played for a few minutes and quickly realized it was worth nothing. This game needs more LOVE.  
Joke aside, this game is more of what LOVE had to offer, including new games modes.

If you liked LOVE (that I have reviewed in more detail than I am currently doing with kuso), you should like this and vice-versa.

edit: fixed countless typos/verrors. Refuses to install into my game. Apparently I paid for nothing.. This mod would be so much better if it didn't have a loco for every car that you have in your consist.. I have PTSD now. Shocked this game isn't more popular. Fantastic experience so far. Story is reasonably engaging, production value equals a typical console title, and the gunplay and core mechanics are fantastic. I've only played solo so far and it's already a blast. Can't wait to try it with friends.. I have mixed feelings about this title.

On one hand, it's got your standard D&D style story and it feels very rewarding when you have the right item for a given situation or when you win a round of combat.

On the other... Losing 20 consecutive dice rolls is NOT cool. (I'm talking to you, Ape Man).

It's cheap and shallow with almost no strategy involed, but opened my eyes to the existence of gamebooks (I was born in 1991). I cannot say I regret the purchase at full price. Just don't expect it to blow your mind and appreciate it for the cultural value.. So, I bought this game for the Trading Cards and to up my game total... It is somewhat simple, and the pictures aren't as graphic as one might fear. And the game itself is... amusing. Carving out portions of a hidden picture while trying not to be hit by sea creatures (or their shot balls of lights) is an interesting concept (I'm sure there is some game out there that this is based on, but I've never seen it). If you manage to get those sea creatures in one of your cuts (without it touching you or the line) you can remove it. Small power-ups can also be gained by cutting them out, such as a speed one, a ghost one, and one that allows you to freeze the sea creatures.

Rather enjoyable, especially for the price of \$2.. Summary:

Cute singleplayer game. Can not recommend for multiplayer V parties, which I bought it for.

Pros:

- + Looks silly
- + Funny sound effects
- + Intuitive controls (in VR)

Cons:

- Multiplayer gameplay is clunky
- UI seems unfinished
