About This Game

Pivot Pilot is a challenging platformer with puzzle elements in which you take simultaneous control of a boy and a giant robot arm. A young boy named Eli is mysteriously trapped in a testing facility and your goal is to make your way through a series of dangerous experiments by cooperating with the robot arm.

Avoid spikes, dodge saw blades, hide from the turrets, watch out the lasers, ride the robot arm, utilize the gravity beams and more to escape the gruesome facility.

- Combines classic platforming with challenging robot arm controls
- 40 experiments + 10 hidden arcade experiments

Great game, just be prepared to die! Alot!. New platformer classic is born! This game is an addicting as it gets. Controls are solid and difficulty is right in the ball park, wanting to try once more. Graphics are well made pixel art and it works like a charm. And I love that the game has very cryptic and mysterious feeling. This game is a solid oldschool platformer with a own twist. I can recommended this to anyone that likes old school platformers!. Surprisingly a good game. Challenging. I only have an hour in as of writing this review but i barely made it like 11 levels in. It's super hard and makes you want to use the bathroom even longer than you anticipated because "I NEED MUH WINS"

5/7 would recommend

but i also don't recommend because i only have 11 levels in after an hour.. Portal meets super meat boy, tricky and awesome!. Really good game similarities for example to Meatboy. Keeps you on the hook from beginning to end :D. Great game! Frustrating, hooking and rewarding. Just the way I like it!

10/10 would fail in orientation of the pivots again!. Such a cool game! Challenging, good looking, awesome soundtrack and I love the robo-arm! <3. Just completed the first testing facility and want to share some early thoughts.

If you like Super Meat Boy, then you are likely to love this one too. These two have many similarities (in a good way), but Pivot Pilot adds refreshing unique gameplay elements, as the title suggests. In addition to the player character, you control a robotic arm by rotating each of its three segments. The robotic arm is used to transport the player character to otherwise unreachable places where he can hit switches and such. Levels are finished by navigating the tip of the arm to the goal. Don't be fooled, it is not as easy as it sounds. Concentration is required to pass the puzzles.

The level design is clever and provides a real challenge with equal satisfaction. Sometimes you really need to rush and get that jumping sequence perfectly executed. There is no blaming the controls: you died - your fault.

And speaking of dying, that is going to happen often. Luckily, the soundtrack is so amazing that it will distract you from getting too frustrated. You might as well just hand out the award for the best video game soundtrack of 2017 already. The graphical style is also spot on.

No reason why this game shouldn't be a great hit.

Nice 2d puzzle game. Will recommend to all my friends!. Really good game similarities for example to Meatboy. Keeps you on the hook from beginning to end :D. Such a cool game! Challenging, good looking, awesome soundtrack and I love the robo-arm! <3. This game brought me back to 90's. I liked the game a lot.

I got good vibes when passing some challenging levels. Feels good.

Music fits really great to this awesome pixel art, also character movement and robot hand handling feels so polished.

I really love the level design on this game and some of the mechanics are absolutely insane.

Definetely looking forward what the creator design next.. I really like this game actually. Found it on reedit! before it released and wanted to try it from there, so I bought it couple days after release. Just now got around to trying it lol and it is well worth it. I have to say that the controls aren't all that intuitive it will take a little bit to get used to but it is a pretty unique game premise for a puzzle game so I think that would be unavoidable. If you like puzzle games that you can spend some time here and there playing then this just might be for you. overall I'd give it 8 out of 10, definitely worth the money.. I experienced more exhilaration during some of just the MINIGAMES in this game than during entire AAA games I've played.

This game is awesome. Runs at 144hz. Super smooth, immediately worked with my DS4 controller. Buttery joystick platforming brilliance while separately controlling hilarious QWOP-like (?) arm mechanics controlled by LB, RB, RT and LT.

Super innovatrive, simple, and exciting. Recommend!. *dies 12,654 times on Test Chamber 1-10*

sees that there are 3 more sets of test chambers after that

cries

Sweet merciful Lord...this game is the platformer equivalent of Octodad. A very interesting mechanic, with an intentionally frustrating control scheme...and it is punishingly difficult.

With your left thumbstick, and your A and X buttons (360 controller), you control a platformer character, jumping around through various tricky obstacles. Nothing too new here.

What makes Pivot Pilot different is that you also control a mechanical arm with the right thumbstick, the bumpers, and the triggers. You use this to help move your character around, and to touch the goalpost at the end of each level. The bulb on the end is extremely fragile, though...so if you touch anything else it shatters, and you lose.

Sometimes you can't see both of your people on the screen at the same time.

Sometimes you don't have time to "tread carefully" with the complicated arm movements.

But you always have to be very, very precise, or you will die.

And you will die. A lot.

It's just about the perfect blend between being a puzzle platformer and being a rage platformer. Pick it up if you like that sort of thing. But avoid it if you have high blood pressure.
